

Resembling a hockey puck, this modified golf ball is designed for practice on and around the greens with immediate feedback on your stroke. The idea behind this dimple-shaped short-game aid is to exaggerate your misses. If you hit a putt off-center, The Pill™ will miss three cups outside the hole instead of a slight miss. You can see your misses and make the proper adjustments.

If hit improperly the ball will either lean to one side and roll off line, or tumble wildly. With small adjustments you will be able to deliver a square face at impact. The will make you a better more consistent putter

Drop it in a bunker and you'll be forced to hit behind the ball with a proper sand swing. If not, you'll hit it thin and leave it in the bunker. Use it around the green with your pitching wedge and watch it roll if hit correctly.
